PROFESSIONAL SUMMARY

Full Stack Engineer with 6+ years of overall software development experience across cross-platform mobile apps, responsive web applications, backend APIs, and data-driven product workflows. Builds with React Native, Expo, React.js, Next.js, TypeScript, Node.js, REST APIs, databases, authentication, and third-party integrations. Experienced in mobile-first UX, reusable architecture, real-time features, performance tuning, and end-to-end feature delivery.

TECHNICAL SKILLS

Mobile Development: React Native CLI, Expo, JavaScript, TypeScript, iOS, Android, responsive/mobile-first UI, push notifications

Web Frontend: React.js, Next.js, Vue.js, Redux Toolkit, MobX, React Query, HTML5, CSS3, Tailwind CSS, Material UI

Backend and APIs: Node.js, Express.js, NestJS, REST APIs, JWT authentication, WebSockets, Prisma ORM, Mongoose

Data and Services: MongoDB, PostgreSQL, MySQL, Firebase, Supabase, AWS S3/EC2, Stripe, PayPal, Google Maps, Google Calendar

Quality and Release: Jest, Cypress, Git, CI/CD, App Store / Google Play deployment workflows, Agile/Scrum, code reviews

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Aviso AI | Mar 2025 - Sep 2026

United States | Remote

- Built enterprise interfaces for an AI-powered revenue-intelligence platform, including dashboards, pipeline management, deal insights, and forecasting workflows.
- Developed reusable Vue.js/TypeScript components, integrated REST APIs, and optimized responsiveness and data handling while collaborating with backend and product teams.

Senior Frontend Developer | Search Atlas | Feb 2026 - Jul 2026

United States | Remote

- Contributed frontend features to an AI-driven SEO product covering keyword research, competitor analysis, content recommendations, backlink tracking, and search-performance monitoring.
- Built user-facing analysis and reporting workflows; also supported an AI-powered business analytics product with revenue forecasts, pipeline analysis, sales performance tracking, and growth insights.

Full Stack Engineer | Enigmatix Global | Sep 2025 - Feb 2026

United Kingdom | Remote

- Delivered web and mobile features with React.js, React Native, and the MERN stack, prioritizing cross-platform behavior, responsive UI, and scalable feature delivery.
- Implemented Redux/MobX state management, reusable components, refactoring, and lazy loading; collaborated with product, design, and engineering teams.

Senior Frontend Engineer | Pragma Techs | Jul 2024 - Oct 2025

Baden-Wuerttemberg, Germany | Remote

- Contributed to an AI-powered LMS across web and mobile, including React Native screens, course recommendations, smart content delivery, and learner analytics.
- Integrated APIs, state management, and real-time workflows, maintaining consistent experiences across mobile and web.

Full-stack Developer | WOSOM Services Limited | Jan 2024 - Jun 2024

Cyprus | Remote

- Built event planning, registration, booking, attendee tracking, and operations-dashboard features for a React-based event-management platform.
- Implemented Redux, code splitting, WebSockets, Recharts, drag-and-drop categorization, Stripe/PayPal, and Google Calendar; reduced load times by 30% and event setup time by 40%.

Mobile Application Developer | Trio Software | Jul 2023 - Dec 2023

Punjab, Pakistan | Remote

- Delivered mobile and responsive web features for food discovery and fitness applications.
- Integrated Google Maps listings, interactive food details, sliders, feedback screens, an exercise builder, exercise directory, and Facebook Live.

Frontend Developer | Enigmatix Pvt Ltd | Jan 2020 - Jul 2023

Bahawalpur District, Punjab, Pakistan | On-site

- Delivered web/mobile e-commerce, dashboard, and inventory features for RentAround and related enterprise products, integrating REST APIs and reusable typed UI.
- Supported dynamic file/folder management, data visualizations, MobX caching, web-worker processing, performance tuning, and team/client collaboration.

SELECTED PROJECTS

AI-Powered Learning Management System (LMS AI)

Product purpose: improve learning and administration through personalized course recommendations, smart content delivery, learner workflows, and performance analytics. Contribution: built web and React Native experiences, reusable UI, API integrations, state management, real-time features, and cross-platform workflows for students and administrators.

RentArround Web and Mobile Marketplace

Product purpose: provide customers and merchants with a streamlined e-commerce experience across web and mobile. Contribution: delivered dashboard and inventory workflows, reusable React/React Native components, typed UI, REST API integration, feature development, debugging, and performance optimization.

Food Discovery Mobile Application

Product purpose: help users discover food venues through location-based listings and rich detail pages. Contribution: integrated Google Maps listings and implemented interactive food details, image sliders, feedback forms, and responsive layouts.

Fitness Application

Product purpose: support users working toward fitness goals through exercise discovery and workout-building experiences. Contribution: developed exercise-builder pages, a registered exercise directory, responsive screens, and Facebook Live integration.

WOSOM Event Management Platform

Product purpose: simplify event discovery, planning, booking, attendee management, and event operations. Contribution: delivered live attendee updates, WebSocket workflows, Recharts dashboards, drag-and-drop categorization, Stripe/PayPal payments, and Google Calendar sync; reported improvements included 30% faster page loads and 40% less event setup time.

Parental Control Mobile Application

Product purpose: give parents a mobile solution to manage and monitor children's digital activities. Contribution: developed an intuitive mobile experience with clear navigation and straightforward user workflows.

E-Marketplace

Product purpose: streamline buying and selling between customers and merchants with intuitive discovery and transaction journeys. Contribution: focused on scalable user-facing flows, navigation, and core marketplace functionality to support both sides of the platform.

Multi-Service Platform and Browser Extensions

Product purpose: extend a multi-service product's functionality to web workflows and browser-based usage. Contribution: built modern UI components, integrated frontend features with backend APIs, developed Chrome extensions, resolved bugs, and improved usability and cross-browser/device consistency.

EDUCATION

Bachelor of Science in Information Technology | The Islamia University of Bahawalpur | Feb 2019 - Jan 2023 | GPA: 3.81/4.00

CERTIFICATIONS

Level I Python Certification | Claude Platform 101 | AI Fluency for Small Businesses | Web Development Fundamentals | Certified JavaScript Specialist (Sololearn) | React and Redux Certified Expert (Sololearn)
